

# SENG 321 Lab

Feb 13/14

# Reminders

**Iteration 2** → updated requirements document due Sunday night

- Changes suggested from clients
- New required information (data models, user stories / use cases / acceptance criteria)
- Make sure diagrams are explained (including your use cases)
  - If you do something that contradicts the textbook– that's ok– but it needs to be explained.

**Team Assessment 3** will open over the weekend. We suggest you stay on track and submit it on Monday, but you have until **Monday Feb 26 if needed.**

## Reminders

- As the document gets larger...
  - Consistency becomes harder (agree on writing standards ahead of time!)
  - Students tend to lose sight of the big picture.
- Design and implement a plan to coordinate your work and revision.

## The rest of this week is to...

Spend your project work.
